

SUMMARY OF EXAMINER INTERVIEW

Applicants' representative, Peter Withstandley (Reg. No. 53,784) conducted a telephone interview with Examiner Campbell on May 16, 2006 regarding the outstanding rejection of this application. The Examiner acknowledged that the Gentner reference describes a system for creating a link from a newly created page to a target page and does not describe placing a link on a target page linking to a newly created page. The Examiner indicated that the addition of language to the claims of the present application that clarify the access and authority to edit each of the subject web pages, would make these claims allowable over the combination of the Dozier and Gentner references.

Applicants would like to thank the Examiner for taking the time to discuss this application.

REMARKS

In view of the above-listed amendments and the remarks to follow, applicants respectfully request allowance of this application.

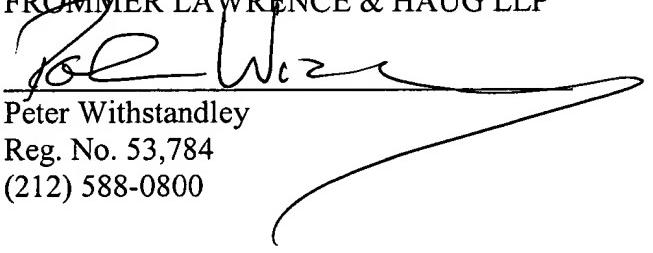

Claims 9-15, 26-28, 35-39, 50-52, 54, and 56-58 are pending in the present application. Applicants have amended independent claims 9, 26, 35, 50, 54, 56, and 57 in order to more clearly define applicants' invention, and in response to comments and suggestions made by the Examiner during a telephone interview on May 16, 2006. In particular these claims have been amended to indicate that a link is placed **on** a web page to which a user does not have access to edit the page, linking **to** a generated web page that the user does have authority to edit.

Applicants respectfully submit that independent claims 9, 26, 35, 50, 54, 56, and 57 are patentable. Dependent claims 10-15, 27-28, 36-39, 51-52, and 59 depend from independent claims , 26, 35, 50, 54, 56, and 57, respectively, and are patentable at least because claims 9, 26, 35, 50, 54, 56, and 57 are patentable.

In the event that the Examiner disagrees with any of the foregoing comments concerning the disclosures in the cited prior art, it is requested that the Examiner indicate where, in the reference, there is the basis for a contrary view.

In view of the foregoing remarks it is believed that all of the claims in this application are patentable over the prior art. Early and favorable consideration of this application is respectfully requested.

Respectfully submitted,
FROMMERM LAWRENCE & HAUG LLP
